Author; **issue number**: page number.

Abedi, J.; **1**: 21.
Ager, T.; **2**: 52.

Benshoof, L. A.; **4**: 113.
Bruno, J.; **1**: 21.

Clariana, R. B.; **1**: 26; **2**: 47; **3**: 67.

ERIC Clearinghouse on Information Resources; **1**: 32; **2**: 64; **3**: 95; **4**: 125.

Farrow, M.; **1**: 9.

Grabinger, R. S.; **3**: 86.

Hannafin, M.; **1**: A-4.
Hooper, S.; **4**: 113.

Janniro, M. J.; **2**: 58.
Jonassen, D.H.; **1**: 1; **3**: 86; **4**: 99.

Martindale, M. J.; **4**: 107.

Oliver, R.; **4**: 118.
Olivier, T. A.; **3**: 81.

Preston, N.; **1**: 32; **2**: 64; **3**: 95; **4**: 125.

Rada, R.; **3**: 75.
Ramsey, P.; **3**: 75.
Reeves, T. C.; **2**: 39.
Rushton, C.; **3**: 75.

Shapiro, F.; **3**: 81.
Sutherland, R. L.; **2**: 63.

Vernon, R. F.; **2**: 35.

Wang, S.; **1**: 1; **3**: 86.
Wei, C.-L.; **1**: 15.
Wilson, B. G.; **3**: 86.

Title Index

Acquiring Structural Knowledge from Semantically Structured Hypertext. Jonassen, D. H., Wang, S.; **1**: 1.

Assessment in a Collaborative Hypermedia Environment: A Case Study. Rushton, C., Ramsey, P., and Rada, R.; **3**: 75.

Changes in Knowledge Structures from Building Semantic Net versus Production Rule Representations of Subject Content. Jonassen, D. H.; **4**: 99.

Concurrent Validity of the Information Referenced Testing Format Using MCW-APM Scoring Methods. Abedi, J., Bruno, J.; **1**: 21.

Constructivist Uses of Expert Systems to Support Learning. Jonassen, D. H., Wilson, B. G., Wang, S., and Grabinger, R. S.; **3**: 86.

Effects of Computer-Based Instruction on Student Learning of Psychophysiological Detection of Deception Test Question Formulation. Janniro, M. J.; **2**: 58.

The Effects of Item Organization and Feedback Density Using Computer-Assisted Multiple-Choice Questions as Instruction. Clariana, R. B.; **1**: 26.

The Effects of Single- and Multiple-Window Presentation on Achievement During Computer-Based Instruction. Benshoof, L. A., Hooper, S.; **4**: 113.

ERIC Research Abstracts selected by N.R. Preston. ERIC Clearinghouse on Information Resources; **1**: 32; **2**: 64; **3**: 95; **4**: 125.

Index to Volume 20. **4**: 127.

Instructional Uses of Computers in Boys', Girls', and Coeducational Senior High Schools in Taiwan, the Republic of China. Wei, C.-L.; **1**: 15.

A Job Well-Done: A Tribute to Allen Avner. Hannafin, M.; **1**: A-4.

Knowledge-Engineering Using Hypercard: A Learning Strategy for Tertiary Education. Farrow, M.; **1**: 9.

Mental Models and Text Schemas: Why Computer Based Tutorials Should Be Considered a Communication Medium. Martindale, M. J.; **4**: 107.

The Motivational Effect of Advisement on Attendance and Achievement in Computer-Based Instruction. Clariana, R. B.; **2**: 47.

Online Placement Testing in Mathematics and Chemistry. Ager, T.; **2**: 52.

Proof-reading on Paper and Screens: The Influence of Practice and Experience on Performance. Oliver, R.; **4**: 118.

Pseudoscience in Computer-Based Instruction: The Case of Learner Control Research. Reeves, T. C.; **2**: 39.

A Review of Multiple-Try Feedback in Traditional and Computer-Based Instruction. Clariana, R. B.; **3**: 67.

Self-Efficacy and Computers. Olivier, T. A., Shapiro, F.; **3**: 81.

Software Review. *DASHER: Foreign Language Authoring System for the Macintosh* by J. P. Pusack and S. K. Otto. Sutherland, R. L.; **2**: 63.

What *Really* Happens to Complimentary Textbook Software? A Case Study in Software Utilization. Vernon, R. F.; **2**: 35.

Journal of Computer-Based Instruction
Autumn 1993, Vol. 20, No. 4, 127-130.

Subject Index

a

Ability to benefit from small group CBI; **2**: 65.
Academic computing; **2**: 35.
Accuracy in proof-reading; **4**: 119.
Adaptive advisement; **2**: 47.
Advantages of peer assessment; **3**: 76.
Advantages of word processors; **4**: 118.
Affinity between tutorials and hypertext; **4**: 111.
Alternative approaches to research; **2**: 44.
Analogies subscale; **1**: 2.
Analytical problems of learner control; **2**: 42.
Andrew Toolkit; **3**: 76.
Answer-until-correct feedback; **3**: 68.
Application of computer technology and cooperative learning in developmental algebra at the community college; **4**: 126.
Aptitude-by-treatment interaction; **2**: 66.
Artificial intelligence; **3**: 93; **4**: 99.
Associative hypertext structures: **1**: 1.
Attitudes toward small group CBI; **2**: 65.
Attributes of screen text that influence reading speed; **4**: 119.
Attrition rates; **2**: 42.
Audit trails; **1**: 5.

b

BASIC programming language; **3**: 97.
Benefits of MTF; **3**: 68.
Bias in teacher assessment; **3**: 75.
Buddy System; **1**: 33.

c

Campus-wide, networked placement tests; **2**: 52.
CBI lesson content; **2**: 59.
Channel One experiment; **2**: 64.
Client; **2**: 53.
Cognitive limitations of browsing behavior; **1**: 7.
Cognitive maps; **4**: 99.
Collaborative hypermedia environment; **3**: 75.
Color in CAI and CBT; **1**: 33.
Combined advisement; **2**: 48.
Communication; **4**: 109.
  medium; **4**: 107.
Compiler; **2**: 53.
Complimentary software; **2**: 35.
Computer as a communication medium; **4**: 108.
Computer Assisted Instruction (CAI);
  in air crew training; **2**: 66.
  in Taiwan; **1**: 15.
  in USSR; **1**: 34.
  in writing/language instruction; **4**: 126.
CAI/Cooperative Learning Project; **1**: 32.
Computer Based Instruction (CBI); **1**: 9, 21, 26; **2**: 39, 58; **3**: 67; **4**: 113.
  in English; **2**: 65.
  in mathematics; **2**: 47; **4**: 113.
Computer-based metacognitive guidance; **2**: 65.
Computer-based peer assessment; **3**: 75.
Computer-based troubleshooting tutor; **4**: 126.
Computer based tutorials; **4**: 107, 110.
Computer graphics feltboards; **2**: 65.
Computer Integrative Practicum (CIP); **1**: 34.
Computer-mediated communication (CMC) in distance education; **3**: 95.
Computer self-confidence of low-achieving girls; **1**: 33.
Computer self-efficacy; **3**: 83.
Computer use in Indiana schools; **1**: 33.
Computerizing the placement exam process; **2**: 52.
Computers and conceptual change; **3**: 98.
Concept maps; **1**: 11.
Concept nodes; **1**: 2.
Conceptualization of content (structural knowledge) by learners; **4**: 99.
Concurrent validity and confidence weighted testing; **1**: 22.
Concurrent validity of the MCW-APM test scoring procedure; **1**: 21.
Construction of knowledge-bases for expert systems; **1**: 10.
Constructivism in the classroom; **4**: 125.
Constructivist uses of expert systems; **3**: 86.
Continuum of expert system applications for learning; **3**: 86.
Continuum of learner latitude; **2**: 40.
Cooperative learning; **4**: 126.
  techniques; **1**: 32.

d

DASHER Authoring System; **2**: 63.
Definitional problems of learner control; **2**: 40.
Delayed feedback; **3**: 67.
Design, development and implementation of a computer-based troubleshooting tutor; **4**: 126.
Design of CBI; **2**: 41.
Designing and constructing HyperCard stacks; **1**: 9.
Development of narrative competence; **2**: 65.
Differences between learning strategies; **1**: 11.
Disadvantages of peer assessment; **3**: 76.
Discourse schemas; **4**: 109.
Distractors; **1**: 27.
Duration of learner control research; **2**: 42.

e

Educational and communication uses of CMC; **3**: 95.
Educational communications and technology; **2**: 64.
Educational computing; **2**: 35.
Educational potential of HyperCard; **1**: 9.
Educational strategy using HyperCard; **1**: 10.
Effect of advisement on attendance and achievement in CBI; **2**: 47.
Effect of extended use of computers on reading achievement; **3**: 98.
Effectiveness of color in instruction; **1**: 33.
Effectiveness of different feedback forms; **3**: 68.
Effectiveness of multiple-choice tests as learning experiences; **1**: 26.
Effectiveness of the BASIC programming language and the HyperCard authoring language on promoting problem-solving skills and reducing computer anxiety; **3**: 97.
Effects of computer-assisted learning-strategy on the achievement of learning objectives; **3**: 96.
Effects of CBI on student learning of PDD test question formulation; **2**: 58.
Effects of computer lab tutorials and cooperative learning on mathematics; **4**: 126.

Effects of learner control over feedback in CBI; **2**: 66.
Effects of question organization on posttest performance; **1**: 27.
Effects of single- and multiple-window presentation on achievement during CBI; **4**: 113.
Effects of using static and animated graphics to increase adult learning; **2**: 58.
Efficacy versus outcome expectations; **3**: 82.
Elaborative feedback; **3**: 67.
Electronic-mail (E-mail); **4**: 125.
Ethics in educational communications; **2**: 64.
Evaluation of CAI in primary grade classrooms; **4**: 126.
Evaluative advisement; **2**: 47.
Expert Pathfinder nets; **4**: 102.
Expert system(s); **3**: 86.
  as a personal knowledge representation tool; **3**: 91.
  as advisors; **3**: 88.
  as Mindtools; **4**: 100.
  models in intelligent tutors; **3**: 89.

f

Facilitations; **2**: 65.
Factors and configurations that impact classroom computer use; **1**: 33.
Factors influencing use of software; **2**: 36.
Factors that may limit the success or word processing in writing; **4**: 118.
Feedback; **3**: 67.
  density; **1**: 27.
  timing; **3**: 67.
Feedback systems for self-reflection; **3**: 90.
Focused feedback; **1**: 27.
Foreign language authoring system; **2**: 63.
Formalisms for representing knowledge; **4**: 101.
Formative assessment; **3**: 75.
Full feedback; **1**: 27.
Future MTF research; **3**: 71.

g

Generative processing; **1**: 4.
Geometry; **2**: 64.
Graphical browsers; **1**: 2.
Graphical knowledge representations; **1**: 11.
Graphics and CBI; **2**: 58.

h

Higher order learning outcomes; **1**: 4.
Human-computer interaction (HCI); **4**: 107.
HyperCard; **1**: 2, 9; **2**: 53.
  authoring language; **3**: 97.
Hypermedia; **3**: 75.
  systems; **1**: 9.
Hypertext; **1**: 1, 9; **4**: 110.
  engines; **1**: 1.
  literacy; **1**: 7.

i

Impact of feedback information on learning; **3**: 67.
Impact of online placement testing on students and advising; **2**: 53.
Influence of previous proof-reading experience and practice on performance; **4**: 120.
Influencing learning through telecommunications and computer conferencing; **3**: 97.
Information processing; **1**: 4.
Information Referenced Testing (IRT) format; **1**: 21.
Installation and uses of computers in Taiwan; **1**: 18.
Instructional computing; **2**: 35.
Instructional development; **2**: 64.
Instructional effects of advisement; **2**: 47.
Instructional effects of feedback; **3**: 67.
Instructional organizers in the design and use of computer-based interactive video; **3**: 96.
Instructional System Design (ISD) strategy; **2**: 59.
Instructional uses of computers in Taiwan; **1**: 15.
Integrated learning system; **1**: 32.
Integrating a learning strategy into CBI; **3**: 97.
Intelligent tutoring systems (ITSs); **3**: 89; **4**: 109.
Interaction between advisement and gender; **2**: 50.
Interactive instruction; **2**: 40.
Investigatory Pedagogical Software (IPS); **1**: 34.
Item organization; **1**: 26.

k

Knowledge-engineering; **1**: 10.
Knowledge of correct response (KCR) feedback; **3**: 67.
Knowledge of response (KR) feedback; **3**: 67.
Knowledge structures; **1**: 1; **4**: 99.
Kolb Learning Style Inventory; **2**: 65.

l

Lack of consequential or relevant outcome measures; **2**: 42.
Learner characteristics and advisement; **2**: 48.
Learner control in CAI; **2**: 66.
Learner control research; **2**: 40.
Learning differences and interactive computer programs; **2**: 65.
Learning Tool; **1**: 6.
Locus of control (LOC); **2**: 48; **3**: 87.
LOGO; **1**: 33; **2**: 64.
LOGO Based Instruction (LBI); **2**: 64.

m

Manipulatives; **2**: 65.
Mathematical exploration by children; **2**: 65.
Memphis Partners' Senior Prep program; **2**: 49.
Mental models; **4**: 107.
Methodological problems of learner control; **2**: 41.
Microcomputer-based laboratory (MBL) activities in the teaching of chemistry; **3**: 95.
Microcomputer environment; **3**: 81.
Mindtools; **4**: 99.
Modeling Pedagogical Software (MPS); **1**: 34.
Modified Confidence Weighted-Admissible Probability Measurement (MCW-APM); **1**: 21.
Motivational aspects of advisement; **2**: 47.
The MUCH System; **3**: 76.
Multidirectional character of e-mail communication; **4**: 125.
Multiple-try feedback (MTF); **3**: 68.
  compared to No Feedback; **3**: 69.
  compared to KR Feedback, Delayed Feedback, and KCR Feedback; **3**: 70.
Multiple-window environments; **4**: 113.
Multiple-window presentation; **4**: 113

n
Networked environment; **2**: 52.

o
Objectivist and constructivist applications of expert systems; **3**: 88.
Online placement testing in mathematics and chemistry; **2**: 52.
Optically scannable assessment format; **1**: 21.
Organization; **1**: 26.
Organizing information; **1**: 10.

p
Paradigms for inquiry in education; **2**: 44.
Part/Whole-task practice methods; **2**: 66.
Pathfinder networks; **4**: 101.
PDD "control" questions; **2**: 59.
PDD "relevant" test questions; **2**: 59.
Pedagogical software
  Content, composition, and structure of; **1**: 34.
Peer assessment; **3**: 76.
  on the MUCH System; **3**: 76.
Personal reasons for not using software; **2**: 37.
Philosophical orientation; **3**: 87.
Placement testing in mathematics and chemistry; **2**: 52.
Political and economic reasons for not using software; **2**: 38.
Positivist, or quantitative, paradigm; **2**: 40.
Prior knowledge levels; **3**: 71.
Probabilistic or confidence weighted test scoring procedures; **1**: 22.
Problem-solving methods; **1**: 34.
Problems with learner control research; **2**: 40.
Procedural facilitation; **2**: 65.
Process-related reasons for not using software; **2**: 38.
Production rule expert systems; **3**: 86; **4**: 99.
Proof-reading on paper and computer screens; **4**: 118.
Pseudoscience; **2**: 39.
Psychophysiological detection of deception (PDD); **2**: 58.

q
Qualifying conditions for applications of learner control; **2**: 41.
Quantitative paradigm; **2**: 39.
Quasi-Experimental Design; **2**: 64.

r
Rational set generator; **1**: 26.
Referential links; **1**: 3.
Relationship between feedback timing and information content; **3**: 67.
Relationship proximity judgments; **1**: 2.
Reliability of online placement tests; **2**: 55.
"Reproducible" test scoring system; **1**: 22.
Research in educational computing; **2**: 39.
Response certitude; **3**: 72.
Restructuring; **1**: 5.
Role of placement exams; **2**: 52.
Role play; **2**: 65.

s
Sample sizes; **2**: 42.
Savings in instructional time; **2**: 61.
Schema theory; **1**: 1.
Schemas; **4**: 109.
Screen editing; **4**: 118.
"Selection credits system"; **3**: 77.
Self-efficacy theory; **3**: 81.
  and computers; **3**: 81.
Semantic map; **1**: 2.
Semantic networking as an integrative strategy; **1**: 5.
Semantic networking tools as mindtools; **4**: 99.
Semantic networks; **1**: 1.
Semantic relationships subscale; **1**: 2.
Semantically structured hypertext; **1**: 1.
Server; **2**: 53.
Single-try feedback (STF); **3**: 67.
Single-window presentation during CBI; **4**: 113.
Small group CBI; **2**: 65.
Social considerations in educational computing; **2**: 64.
SoftPsych; **2**: 36.
Software approaches to children's mathematical exploration; **2**: 65.
Software utilization; **2**: 35.
Sources of efficacy information; **3**: 82.
Spatially-related problem solving; **3**: 98.
Structural knowledge; **1**: 2.
Structural knowledge acquisition; **1**: 7.
Student-teacher interactions in computer settings; **1**: 32.
Summative assessment; **3**: 75.

t
Taiwan's information industry; **1**: 15.
Teachers' attitudes and opinions about computers in Taiwan; **1**: 19.
Teachers' understanding and use of technology for instruction; **3**: 96.
Teaching-learning strategies that are facilitated by the use of technology; **1**: 33.
Teaching with and about computers in Taiwan; **1**: 18.
Technical reasons for not using software; **2**: 37.
Technology-intensive curriculum for functions and graphs; **4**: 125.
Telecommunications technology; **3**: 97.
Tertiary education; **1**: 10.
Test analysis; **2**: 53.
Test question formulation (TQF); **2**: 58.
Test reliability, scoring methods and validity; **1**: 21.
Text density; **1**: 27.
Text schemas; **4**: 110.
Thematic and linguistic analysis of e-mail communication; **4**: 125.
Theoretical problems of learner control; **2**: 41.
Trade off between test reliability and test validity; **1**: 22.
Treatment or research duration; **2**: 42.
Troubleshooting abilities; **4**: 126.

u
Use of manipulatives; **2**: 65.
Using computers as tools in Taiwan; **1**: 19.

w
Window presentation style and window location; **4**: 113.
Word processing; **4**: 118.
"Writing Partner"; **2**: 65.
